JOURNAL OF
The Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at NJ Institute of Technology with strong links to the Institute of Polymer Technology and materials engineering of Loughborough University (UK). Its mission is to assist industry by advancing knowledge in the field of Polymer Technology and related areas through sponsored research, development, and education, and to disseminate information via all appropriate mechanisms for technology transfer.

JOURNAL OF
The Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at NJ Institute of Technology with strong links to the Institute of Polymer Technology and materials engineering of Loughborough University (UK). Its mission is to assist industry by advancing knowledge in the field of Polymer Technology and related areas through sponsored research, development, and education, and to disseminate information via all appropriate mechanisms for technology transfer.

Contents of Volume 25

Number 1, Spring 2006

FEATURES

A Generic Controller for Part Surface Temperature on a Plastic Injection Molding Machine 1
R. Dubay, B. Pramujati, and M. Hernandez

Profiling of Injection Velocity for Uniform Mold Filling 13
Xi Chen and Furong Gao

Modeling of Transport Phenomena and Melting Kinetics of Starch in a Co-Rotating Twin-Screw Extruder 22
Lijun Wang, David D. Jones, Curtis L. Weller, and Milford A. Hanna

Synthesis and Characterization of Phenyl Methacrylamide Copolymers 41
G. Jayasimha Reddy, S. Venkata Naidu, and A. V. Rami Reddy

Influence of Postcuring Conditions on the Processing Characteristics of Epoxy Components 51
Tomasz Nowak, Robert Sekuła, Piotr Saj, Krzysztof Kasza, Helmuth Leskosek, and Oliver Claus

Effects of Coloration on the Physical and Mechanical Properties and on the Thermal Stability of Polyoxymethylene 63
V.-M. Archodoulaki, S. Lüftl, and S. Seidler

ERRATUM

Low-Temperature Modeling of the Time-Temperature Shift Factor for Polycarbonate 73
Bingfeng Fan and David O. Kazmer

DEPARTMENTS

News from the Polymer Processing Institute 74

Number 2, Summer 2006

FEATURES

Mixing Immiscible Blends in an Intermeshing Counter-Rotating Twin Screw Extruder 81
Ramesh Potluri, David Todd, and Costas Gogos

An Analysis of the Effect of Elongational Viscosity on the Flow in a Spiral–Mandrel Die 90
Y. Sun and M. Gupta

Factors Affecting the Formation of Fingering in Water-Assisted Injection-Molded Thermoplastics 98
Shih-Jung Liu and Shih-Po Lin

Radiation Curing of Diacrylate Glycerolate of Bisphenol-A in the Presence of an Organically Modified Montmorillonite for the Production of Flame-Resistant Polymer–Clay Composites 109
Giuseppe Spadaro, Clelia Dispenza, Sabina Alessi, Giuseppina Tartaglione, and Giovanni Camino

Processing of PEMFC Membranes by Extrusion: Part 1. Sulfonated Polysulfone in Acid Form 121
Philippe Bébin and Hervé Galiano

Processing of Sulfonated Polysulfone for PEMFC Membrane Applications: Part 2. Polymer in Salt Form 127
Philippe Bébin and Hervé Galiano

DEPARTMENTS

News from the Polymer Processing Institute 134

Number 3, Fall 2006

REVIEW

Syndiotactic Polystyrene: Process and Applications 141
Jürgen Schellenberg and Hans-Joachim Leder

FEATURES

Smart Blending Technology Enabled by Chaotic Advection 152
D. A. Zumbrunnen, R. Subrahmanian, B. Kulshreshtha, and C. Mahesha

Cavity Pressure Control During Cooling in Plastic Injection Molding 170
B. Pramujati, R. Dubay, and C. Samaan

3D Numerical Simulation of the Flow of Viscous Newtonian and Shear Thinning Fluids in a Twin Sigma Blade Mixer 182
Robin K. Connelly and Jozef L. Kokini

Effect of Preheat Temperature on the Location of the Minimum State of Cure in a Molded Component 195
Russell L. Warley

Influence of Electron Beam Irradiation and Polyfunctional Monomer Loading on the Physico-Chemical Properties of Polyethylene/Polypropylene Blends 208
Z. I. Ali, H. A. Youssef, Hossam M. Said, and H. H. Saleh

DEPARTMENTS

News from the Polymer Processing Institute 218

Number 4, Winter 2006

GENERAL ARTICLES

Crystallization Effects on Autoclave Foaming of Polycarbonate Using Supercritical Carbon Dioxide 225
L. Mascia, G. Del Re, P. P. Ponti, S. Bologna, G. Di Giacomo, and B. Haworth

Rheological Properties and Processability of Chemically Modified Poly(ethylene terephthalate-*co*-ethylene isophthalate) 236
Masayuki Yamaguchi and Takashi Wakabayashi

VOLUME CONTENTS

Microwave-Assisted Depolymerization of Poly(ethylene terephthalate) [PET] at Atmospheric Pressure 242
Mir Mohammad Alavi Nikje and Fatemeh Nazari

Three-Dimensional Numerical Simulation of Injection Mold Filling With a Finite-Volume Method and Parallel Computing 247
Jian Zhou and Lih-Sheng Turng

Numerical Prediction and Experimental Validation of Viscoelastic Annular Swell 259
Han-Xiong Huang, Yan-Sheng Miao, and Dong Li

REVIEW

Preparation of Polymer–Clay Nanocomposites and Their Properties 270
Quang T. Nguyen and Donald G. Baird

DEPARTMENTS

News from the Polymer Processing Institute 286

Indexes to Volume 25 294
